EDUCATION

Sakarya University | Sakarya, Türkiye **Sep 2023 - Jun 2027**
Bachelor of Science in Computer Engineering

EXPERIENCE

Argede Information Technologies | Software Engineering Intern **Aug 2026 - Sep 2026**
Designed and implemented end-to-end features for a full-stack web application, developing RESTful APIs, building dynamic user interfaces, and integrating database operations.

Sakarya University (IT Dept.) | Hardware & IT Support Intern **Jun 2026 - Jul 2026**
Maintained and diagnosed faculty-wide workstation hardware, configured local network infrastructure, and resolved technical hardware issues to ensure uninterrupted academic and administrative operations.

PROJECTS

ANKA: Off-Grid Location Detection System (TÜBİTAK 2209-B)
Project aims to provide high-accuracy location detection for victims trapped under rubble. Developed technical expertise in BLE (Bluetooth Low Energy) protocols, crisis-time system reliability, and hybrid positioning algorithms within an R&D methodology.

Derman: AI-Powered Disaster Relief & Aid Coordination Platform
Architected a real-time disaster coordination platform using .NET 10, ASP.NET Core, and Blazor Server, integrating Gemini API for automated triage scoring, SignalR for encrypted live chat, and OpenStreetMap/Leaflet with dynamic location fuzzing to securely match victims with verified volunteers.

Tiger Fitness Center Management System
A comprehensive web platform providing end-to-end management through user and admin panels, utilizing REST API for data communication. Features an AI module integrated with the Groq API to provide users with smart fitness and nutrition guidance. Mastered N-Tier Architecture, third-party API integration, and enterprise-level database management.

MyInventory: Automated Desktop Inventory & Stock Management System
Project aims to streamline stock control and supplier management by utilizing C#, .NET, and Entity Framework Core, featuring automated Excel reporting pipelines and robust relational database migrations to eliminate manual record-keeping errors.

Anlatmaca: Word Game
A mobile word-guessing game built with modern interface principles. Engineered complex game logic, optimized responsive UI flows, implemented robust state management, and oversaw mobile publishing workflows.

SKILLS

- **Programming Languages:** C++, C#, Java, Dart, Python, JavaScript
- **Frameworks & Libraries:** ASP.NET Core, Blazor, Entity Framework Core, Flutter, Riverpod
- **Databases & Tools:** PostgreSQL, MS SQL Server, Firebase, RESTful APIs, Git, Docker
- **Core Competencies:** OOP, N-Tier Architecture, Database Design, AI/LLM Integration

CERTIFICATIONS

- Web Programming with ASP.NET – BTK Academy (Aug 2026)
